

SSBL-220 & SSBL-320

PRODUCT INFORMATION

Santex **SSBL-220 & SSBL-320** are premium, synthetic lubricants formulated to provide maximum lubrication protection and service for all positive displacement blowers including **Roots (Dresser), Gardner-Denver, Sutorbilt, Lamson and Duroflow**. Advantages over petroleum lubricants include extended lubricant life (with planned used oil analysis), reduced operating temperatures, better corrosion protection, enhanced low and high temperature lubricating properties, longer blower life with reduced wear, and lower maintenance costs. **SSBL-220 & SSBL-320** synthetic lubricants exceed the specification requirements for all of the major manufacturers of positive displacement blowers.

BENEFITS

- Formulated synthetic lubricants specifically for positive displacement (PD) blowers
- Available in ISO viscosity grades 220 and 320
- Special additives to provide greater corrosion protection
- Reduced operating temperatures and maintenance costs
- Provide excellent anti-rust and anti-corrosion protection
- Superior low & high temperature lubricating properties
- Exceed manufacturers' lubricant specifications
- Fewer oil drain and service intervals resulting in reduced maintenance and oil disposal costs
- Eliminate seasonal oil viscosity grade changes

APPLICATIONS

- For all positive displacement blowers (PD) including **Roots, Gardner-Denver, Sutorbilt, Lamson and Duroflow**.
- Designed for food processing (if NSF H1 is required the **SSBL Series FG** would apply) fluid agitation, pulp & paper processing, pneumatic conveyor systems, environmental remediation, vacuum systems, wastewater treatment and many more applications.

SSBL-220 & SSBL-320 are compatible with most commonly used seals, plastics & paints.

SSBL SERIES

ISO VG	220	320
Viscosity		
@ 40°C, cSt	206.2	302.6
@ 100°C, cSt	23.4	31.0
@ 100°F, SUS	1086	1619
@ 210°F, SUS	116	150
Viscosity Index	140	141
Pour Point, °F (°C)	-45 (-43)	-40 (-40)
Flash Point, °F (°C)	475 (246)	485 (252)
Specific Gravity	0.869	0.874
Copper Corrosion	1A	1A

Santex Blower lubricants offer compatibility with equivalent OEM lubricants. To cross reference a lubricant or for additional information please email: Info@santexdirect.com
